FOR IMMEDIATE RELEASE

Law and Order Magazine Names Intellicheck's Law ID As Top Public Safety App For 2016
Top 12 List of Technology Solutions Featured As Must Have Public Safety Apps

JERICHO, NEW YORK – April 26, 2016–Intellicheck Mobilisa, Inc. (NYSE MKT:IDN), a leader in threat identification, identity authentication, verification and validation solutions, today announced that its industry leading Law ID® technology solution has been named a top public safety app for 2016 by *Law and Order* magazine. The prestigious publication calls its list of 2016's top 12 technology solutions "must have public safety apps" for law enforcement. *Law and Order* has been serving the law enforcement community for 63 years. The print and digital magazine reaches top and middle management at law enforcement agencies in every state, county and local jurisdiction in the U.S.

"We are thrilled to receive this recognition from such a prestigious publication. This noteworthy achievement represents a milestone for our organization and further validates our success in delivering the preeminent threat identification, identification authentication and contact status technology solution for local, state and federal law enforcement personnel. We are proud that Law ID is making a critical difference in protecting the lives of law enforcement officers and the citizens they serve every day," said Dr. William Roof, CEO of Intellicheck.

Law ID is the industry's most accurate and customizable solution for immediately authenticating a contact's identification and determining the threat status of an unknown and potentially dangerous contact. The solution reads embedded information on driver licenses and other government issued identification documents, while concurrently searching departments of motor vehicles, state, federal and other authoritative law enforcement data sources. Law ID delivers real-time search results to the law enforcement officer's smartphone or other mobile device on vital factors that include wants, warrants, parole and probation status, terrorist watch list matches, be-on-the-look-out alerts, and child predator or spousal abuser status. Importantly, Law ID also enhances citizen safety by quickly de-escalating a situation based upon rapid access to critical information. Law ID is ideal for assisting in traffic stops, detective and undercover operations, security at outdoor events and everywhere law enforcement is on duty and immediately needs to know a contacts' threat status. Providing several major safety, cost and timesaving benefits, it is an affordable solution that is scalable for small to large police departments, as well as state and federal law enforcement and criminal justice agencies.

Intellicheck Mobilisa's significant portfolio of 25 patents includes many pertaining to identification and threat identification technology. Its identification solutions support customers in law enforcement, national defense, retail, hospitality and financial markets. The Company's products scan, authenticate and analyze components of identity documents including driver licenses, military identification cards and other government forms of identification containing magnetic stripe, barcode and smart chip information. Once extracted from the identity card, the information can be used to conduct instant threat analysis and identification and to provide safety, security and efficiencies throughout these markets. Unlike competitive solutions that lack full regulatory compliance, the highest degree of data accuracy, and real-time search results capabilities on both mobile and existing fixed infrastructures, Intellicheck's technology solutions are unique in their ability to provide accurate, real-time threat identification, identification authentication and situational awareness that is fully regulatory compliant.
