JERICHO, NEW YORK – May 10, 2017—[Intellicheck Mobilisa](#), Inc. (NYSE MKT:IDN), an industry leader in delivering real-time threat identification and identification authentication that provides the "antivirus" to the epidemic of counterfeit IDs, today announced its financial results for the quarter ended March 31, 2017.

Revenue for the first quarter ended March 31, 2017 decreased 25% to \$713,000 compared to \$951,000 for the quarter ended March 31, 2016. The Company's booked orders for the three months ended March 31, 2017 were approximately \$510,000 compared to \$1,134,000 for the March 2016 quarter. Gross profit as a percentage of revenues was 84.6% for the three months ended March 31, 2017 compared to 82.8% for the three months ended March 31, 2016.

Operating expenses, which consist of selling, general and administrative, and research and development expenses, decreased by approximately 47% or \$1,393,000 to \$1,543,000 for the three months ended March 31, 2017 from \$2,936,000 for the three months ended March 31, 2016. A reconciliation of net loss to adjusted EBITDA is provided elsewhere in this release.

"We now believe our outlook to be even stronger than we communicated on our fourth quarter earnings call. Our financial metrics show marked improvement with demonstrated increased gross margins, ongoing success in lowering operating expenses and significantly improved EBITDA performance. We believe that our sales and product development processes are returning the value we expected. We presently anticipate persistent, increasing momentum as pilots convert to contracts and our client engagement demonstrates escalating strength. We are seeing our robust and growing product suites of industry leading technology solutions

enthusiastically embraced by an expanding client base ranging from large financial institutions and major national retailers to alcohol control and law enforcement organizations,” said Intellicheck CEO Dr. William Roof.

“Every sign reinforces our belief that we are at a decisive turning point for the Company. The turn-around plan we initiated beginning in late 2014 is demonstrating its effectiveness underscoring our belief and forecast that Intellicheck anticipates a turn to EBITDA positive in late 2017 or early 2018,” Dr. Roof concluded.

The financial results reported today do not take into account any adjustments that may be required in connection with the completion of the Company’s review process and should be considered preliminary until Intellicheck Mobilisa files its Form 10-Q for the fiscal quarter ended March 31, 2017.

Adjusted EBITDA

Intellicheck Mobilisa uses Adjusted EBITDA as a non-GAAP financial performance measurement. Adjusted EBITDA is calculated by starting with net income (loss) and adding back interest, income taxes, impairments of long-lived assets and goodwill, depreciation, amortization and stock-based compensation expense. Adjusted EBITDA is provided to investors to supplement the results of operations reported in accordance with GAAP. Management believes that Adjusted EBITDA provides an additional tool for investors to use in comparing Intellicheck Mobilisa financial results with other companies that also use Adjusted EBITDA in their communications to investors. By excluding non-cash charges such as impairments of long-lived assets and goodwill, amortization, depreciation and stock-based compensation, as well as non-operating charges for interest and income taxes, investors can evaluate the Company's operations and compare its results on a more consistent basis to the results of other companies. In addition, adjusted EBITDA is one of the primary measures that management uses to monitor and evaluate financial and operating results.

Intellicheck Mobilisa considers Adjusted EBITDA to be an important indicator of the Company's operational strength and performance of its business and a useful measure of the Company's historical operating trends. However, there are significant limitations to the use of Adjusted EBITDA, because it excludes interest income and expense, impairments of long-lived assets and goodwill, and stock based compensation expense, all of which impact the Company's profitability, as well as depreciation and amortization related to the use of long-term assets, which benefit multiple periods. Intellicheck Mobilisa believes that these limitations are compensated by providing Adjusted EBITDA only as a supplement to GAAP net income (loss) and clearly identifying the difference between the two measures. Consequently, Adjusted EBITDA should not be considered in isolation or as a substitute for net income (loss) presented

in accordance with GAAP. Adjusted EBITDA as defined by the Company may not be comparable with similarly named measures provided by other entities.
