

Intellicheck to Participate in the Mississippi Association of Chiefs of Police 2017 Winter Conference

JERICHO, NY – December 6, 2017 – [Intellicheck](#) (NYSE AMERICAN: IDN), an industry leader in real time threat identification and identification authentication technology solutions, today announced it will participate in the Mississippi Association of Chiefs of Police 2017 Winter Conference. The conference will be December 11 to 15, 2017 in Starkville, Mississippi at The Mill Conference Center at the Courtyard Marriott.

Veteran former law enforcement officer and technology professional Michael McDonald, Intellicheck's business development manager for law enforcement solutions, and Director of Client Partnerships Keith Peters will be demonstrating the company's acclaimed [Law ID™](#) and [Age ID™](#) technology solutions on the conference floor.

"With the success and growing adoption of Age ID in the Mississippi law enforcement community, we are very excited to introduce Law ID to the Mississippi Association of Chiefs of Police. This cutting-edge technology solution takes its place beside Age ID as a vital tool at a time when law enforcement officers are facing ever-growing challenges. We are proud that Law ID is making a crucial difference in protecting the lives of law enforcement officers and the citizens they serve," according to Intellicheck Interim CEO Bill White.

Law ID is the leading threat identification and ID authentication technology solution for local, state and federal law enforcement personnel. It was named a must have public safety app for law enforcement in 2016. Law ID delivers real-time authentication of scanned driver licenses or other government issued IDs on a smartphone or tablet and queries law enforcement data sources, enabling law enforcement personnel to quickly view highlighted, vital query responses without losing contact with persons unknown to them during an encounter. Query responses include wanted person information, gang involvement, known or suspected terrorist data, violent felon information and other person-related records in the FBI's National Crime Information Center (NCIC) databases as well as Departments of Motor Vehicle information regarding an individual's driver license. Officers can also obtain vehicle registration data as well as check whether items officers encounter such as boats, weapons, vehicles, and vehicles license plates are reported stolen.

Age ID is widely recognized by many in law enforcement as the most effective identity authentication and age verification technology solution available. Law enforcement efforts to curtail access to age-restricted products like alcohol, tobacco and marijuana available at establishments such as bars, restaurants, retail establishments and age-restricted venues such as clubs and casinos, have become an increasingly difficult task. Technology has made fake and altered IDs so sophisticated that it is virtually impossible to spot them with old school methods like the human eye. Age ID reads the data encoded on driver licenses and other government issued IDs, verifying the authenticity of the ID and age information in real-time. It can be deployed on mobile devices including smartphones and tablets.

Safe Harbor Statement

Statements in this news release about Intellicheck's future expectations, including: the advantages of our products, future demand for Intellicheck's existing and future products, whether revenue and other financial metrics will improve in future periods, whether Intellicheck will be able to execute its turn-around plan or whether successful execution of the plan will result in increased revenues, whether sales of our products will continue at historic levels or increase, whether brand value and market awareness will grow, whether the Company can leverage existing partnerships or enter into new ones, and all other statements in this release, other than historical facts, are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 (PSLRA). These statements, which express management's current views concerning future events, trends, contingencies or results, appear at various places in this website and use words like "anticipate," "assume," "believe," "continue," "estimate," "expect," "forecast," "future," "intend," "plan," "potential," "predict," "project," "strategy," "target" and similar terms, and future or conditional tense verbs like "could," "may," "might," "should," "will" and "would" are forward-looking statements within the meaning of the PSLRA. This statement is included for the express purpose of availing Intellicheck, Inc. of the protections of the safe harbor provisions of the PSLRA. It is important to note that actual results and ultimate corporate actions could differ materially from those in such forward-looking statements based on such factors as market acceptance of Intellicheck's products and the presently anticipated growth in the commercial adoption of the Company's products and services, changing levels of demand for Intellicheck's current and future products, Intellicheck's ability to reduce or maintain expenses while increasing sales, customer results achieved using our products in both the short and long term, success of future research and development activities, Intellicheck's ability to successfully manufacture, market and sell its products, Intellicheck's ability to manufacture its products in sufficient quantities to meet demand within required delivery time periods while meeting its quality control standards, any delays or difficulties in the Company's supply chain, the success of the Company's sales and marketing efforts coupled with the typically long sales and implementation cycle for its products, Intellicheck's ability to enforce its intellectual property rights, changes in laws and regulations applicable to the Company's products, the

Company's continued ability to access government-provided data, the risks inherent in doing business with the government including audits and contract cancellations, liability resulting from any security breaches or product failure, and other risks detailed from time to time in Intellicheck's reports filed with the SEC. We do not assume any obligation to update the forward-looking information.
