

## **Delaware Alcohol Tobacco Enforcement Equips Officers With Intellicheck's Law ID**

*Officers Gain Instant Access to Vital Information*

MELVILLE, NEW YORK – June 19, 2018 – [Intellicheck's](#) (NYSE AMERICAN: IDN) [Law ID®](#) is being used by Delaware Division of Alcohol and Tobacco Enforcement (DATE) agents across the state to enhance enforcement capabilities with instant access to essential information. DATE enforcement agents are using the leading SaaS technology solution on smartphones to scan bar coded information on driver licenses and other forms of identification to spot altered and fake IDs preventing underage access to alcoholic beverages and tobacco. At the same time, Law ID automatically makes inquiries to the National Crime Information Center (NCIC), state databases containing state and local status, and resident state DMV data to determine if there are outstanding legal or administrative issues with the individual in question. Law ID provides immediate access to potentially critical information through Nlets, the premiere International Justice and Public Safety Network.

Once a driver's license or other identification is determined to be authentic, DATE officers, like their law enforcement colleagues throughout the state, typically run additional checks to determine whether there are any outstanding issues associated with the individual including whether the person is wanted in Delaware or by another state. By simultaneously running these inquiries from the data extracted from the original barcode scan, Law ID provides a new level of speed and efficiency, eliminating the delays and potential dangers associated with returning to police vehicles to run time consuming queries.

Headquartered in Dover, Delaware, DATE agents are certified police officers in the State of Delaware. Agents have statewide jurisdiction and arrest powers, which gives them full authority to enforce all laws of the State of Delaware, including liquor, drug, criminal and traffic statutes. In addition to enforcing alcohol and tobacco control laws and checking all establishments that sell these age restricted products, DATE's mission includes the need to maintain the highest state of preparedness for responding to threats against homeland security.

DATE becomes the first law enforcement agency in the state of Delaware to use Law ID. The milestone achievement follows the technology solutions' network integration in Delaware and its success in becoming operational at the Network Operations Center (NOC) of Nlets, the primary mechanism for interstate law enforcement data exchange for 50 years.

"We are very excited to welcome DATE as our first partner in the state of Delaware. This is an important step forward in our plans to serve law enforcement agencies in Delaware and in states across the country. Law ID is a real game changer that allows law enforcement users to confidently confront the challenges they face daily and better protect themselves and the communities they serve. We look forward to announcing many new partnerships in the near future," said Intellicheck CEO Bryan Lewis.

Law ID enables law enforcement personnel to quickly view highlighted query responses during an encounter. In addition to identification authentication, query responses include wanted person information, gang involvement, known or suspected terrorist data, violent felon information and other person-related records in the FBI's National Crime Information Center (NCIC) databases. Photos of encountered subjects are also included, where made available by the states, as well as search results of an individual's driver license. Officers can also obtain vehicle registration data as well as check whether items officers encounter such as weapons, articles, vehicles, boats, and license plates are reported stolen.

**Safe Harbor Statement**

Statements in this news release about Intellicheck's future expectations, including: the advantages of our products, future demand for Intellicheck's existing and future products, whether revenue and other financial metrics will improve in future periods, whether Intellicheck will be able to execute its turn-around plan or whether successful execution of the plan will result in increased revenues, whether sales of our products will continue at historic levels or increase, whether brand value and market awareness will grow, whether the Company can leverage existing partnerships or enter into new ones, and all other statements in this release,

other than historical facts, are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 (PSLRA). These statements, which express management’s current views concerning future events, trends, contingencies or results, appear at various places in this website and use words like “anticipate,” “assume,” “believe,” “continue,” “estimate,” “expect,” “forecast,” “future,” “intend,” “plan,” “potential,” “predict,” “project,” “strategy,” “target” and similar terms, and future or conditional tense verbs like “could,” “may,” “might,” “should,” “will” and “would” are forward-looking statements within the meaning of the PSLRA. This statement is included for the express purpose of availing Intellicheck, Inc. of the protections of the safe harbor provisions of the PSLRA. It is important to note that actual results and ultimate corporate actions could differ materially from those in such forward-looking statements based on such factors as market acceptance of Intellicheck’s products and the presently anticipated growth in the commercial adoption of the Company’s products and services, changing levels of demand for Intellicheck’s current and future products, Intellicheck’s ability to reduce or maintain expenses while increasing sales, customer results achieved using our products in both the short and long term, success of future research and development activities, Intellicheck’s ability to successfully manufacture, market and sell its products, Intellicheck’s ability to manufacture its products in sufficient quantities to meet demand within required delivery time periods while meeting its quality control standards, any delays or difficulties in the Company’s supply chain, the success of the Company’s sales and marketing efforts coupled with the typically long sales and implementation cycle for its products, Intellicheck’s ability to enforce its intellectual property rights, changes in laws and regulations applicable to the Company’s products, the Company’s continued ability to access government-provided data, the risks inherent in doing business with the government including audits and contract cancellations, liability resulting from any security breaches or product failure, and other risks detailed from time to time in Intellicheck’s reports filed with the SEC. We do not assume any obligation to update the forward-looking information.
