

SOLUTIONS BRIEF

LAW ENFORCEMENT

MAKE EVERY CONTACT SAFER

The Challenge: Every contact carries risks

Every time a law-enforcement officer interacts with an individual whether the result of a vehicle or pedestrian stop, the officer has a need to know the true identity of the individual they have encountered and any officer safety issues. Law ID takes the capabilities formerly only available via the MDT or dispatch and puts them in the palm of the officer's hand. The most common and popular inquiries an officer makes related to an individual can quickly be done on a smart phone, with one important enhancement – the ID is instantly authenticated before the inquiries are sent.

THE INTELLICHECK SOLUTION: Enhanced awareness, safer stops

An officer's first action using Law ID is to scan the barcode on the back of the driver's license to authenticate it – no more manual entry. To do this:

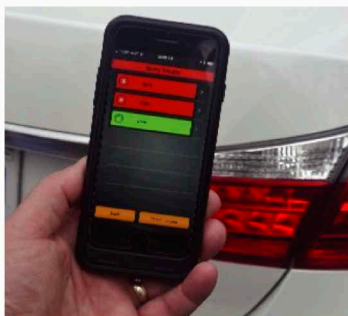

- Simply hold the barcode in front of the camera of the smart phone
 - The camera auto-focuses and auto-snaps a photo of the bar code
 - Bar code is sent to the cloud, instantly authenticating the ID

Once identity of the person is validated from the bar code scan, Law ID automatically and without further action by the officer:

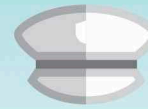

- Makes inquiries from the data obtained from the ID to
 - The National Crime Information Center (NCIC)
 - State databases containing state and local status files
 - The State DMV where the person is licensed

• Also permits inquiries using the keyboard for

- Vehicle Registrations
- Stolen Vehicles
- Boat Registrations
- Stolen Boats
- Stolen Guns
- Stolen Articles

Increases Officer's Safety:

- Rapid authentication and inquiry supports de-escalation of officer-citizen contact
- Threat level is labeled and displayed to officer
- Maximizes visual contact

Mobile Effectiveness:

- Deploys on iPhone and Android devices
- Comprehensive data prepares officer for any interaction
- Proprietary Database of 250+ barcoded US ID formats including Canada and Mexico

Databases Accessed in Seconds:

- NCIC
- State
- DMV

Intellicheck's Leading Edge Technology:

- Premier solution for threat identification and identification authentication
- No manual entry required
- Pushes updates when new formats are issued and fraudulent formats emerge
