

## **Fairfield University Underscores Student Safety and Security with Intellicheck's Age ID**

MELVILLE, NEW YORK – October 10, 2018 – Fairfield University is building on its commitment to campus safety with the adoption of Intellicheck's (NYSE AMERICAN: IDN) Age ID. The state-of-the-art technology solution is being used by the Department of Public Safety to manage on and off campus events. On campus, Age ID is being used at specific building and university entry points to authenticate IDs. Age ID is also providing public safety officials with the ability to create a “banned” list, which allows users to track individuals who are restricted from accessing university facilities or events. Age ID instantly authenticates driver licenses and other forms of identification to prevent the use of altered and fake IDs.

“At Fairfield University, the safety of our campus community is a top priority,” said Todd Pelazza, Director of Public Safety. “The Intellicheck system will provide the university with another resource for keeping our faculty, staff and students safe.”

Fairfield University is a private Jesuit Catholic research university located in Fairfield, Connecticut. It is one of 28-member institutions of the Association of Jesuit Colleges and Universities.

“We appreciate the great responsibility that comes with protecting the safety and well-being of the students, faculty and staff and we welcome this partnership and the opportunity to support Fairfield University's Department of Public Safety. We are confident that these public safety officials and the campus population they serve will benefit from the advanced protections afforded by Age ID that have proven so effective for more than 40 enforcement agencies across the country,” said Intellicheck CEO Bryan Lewis.

Age ID authenticates IDs and verifies age information in real-time with 99.9% accuracy. The cutting-edge technology solution draws on a comprehensive, proprietary database, updated on an ongoing basis, to ensure information is timely and accurate.
