

Intellicheck Named A Leader in Identity and Document Verification in One World Identity's 2019 Identity Industry Landscape

MELVILLE, NEW YORK — January 14, 2020 - [Intellicheck](#) (NYSE AMERICAN: IDN) today announced that it has been recognized as a leader in identity and document verification by [One World Identity](#) (OWI), a market intelligence and strategy firm focused on identity, trust, and the data economy. Intellicheck was selected from a pool of over 2,000 companies.

“We are very gratified to be recognized by OWI. It affirms the important difference Intellicheck’s technology solutions are making for top financial institutions, credit card issuers, U.S. and Canadian retailers at more than 17,000 retail locations, law enforcement and government agencies. Our technology solutions are having a vital impact in averting the costly and erosive damage associated with the criminal use of stolen personally identifiable information to perpetrate fraudulent activities ranging from new account openings and account takeovers to fraudulent purchases and returns. We are equally proud of the difference our state-of-the art technology solutions are making in preventing underage access to age-restricted products including vaping materials, cannabis and alcohol,” said Intellicheck CEO Bryan Lewis.

Annually, OWI designs an Identity Landscape, providing a comprehensive and holistic view of leaders in the identity space. As the identity industry is rapidly developing, OWI’s landscape provides an unparalleled overview of how digital identity applications are evolving and the companies and markets shaping next-generation digital identity.

“Since 2017, the number of identity companies has more than quadrupled, from 500 companies to over 2,000,” said Travis Jarae, CEO and Founder of OWI. “With the wave of data breaches and privacy scandals, there is a rapid expansion of identity products and solutions. The OWI team interacts with identity companies every day, from startups to enterprise. We’re proud to share the Identity Landscape each year to distill how new companies, products, and solutions are shaping the future of identity.”

Intellicheck is focused on delivering real-time identification authentication and verification. The company's SaaS technology solutions are more than 99% effective. Intellicheck's suite of products deliver a frictionless consumer experience and can be deployed on mobile devices, including tablets and smartphones, as well as online and on point of sale systems.

The OWI Identity Landscape is a tool to help companies keep track of market growth and trends and understand the strategic importance of digital identity moving into 2020 and beyond. OWI will be releasing a more detailed research report delving into the details of each market segment and how companies within the industry overlap and intersect in upcoming months.
