

Intellicheck Achieves ISO/IEC 27001:2013 and ISO/IEC 27001:2019 Recertification

MELVILLE, NY – January 30, 2024 – [Intellicheck](#), Inc. (Nasdaq: IDN), an industry-leading identity company delivering on-demand digital and physical identification validation solutions, today announced it has successfully completed intensive third-party surveillance audits to retain certification status for another year from the International Standards Organization for ISO/IEC 27001:2013 and ISO/IEC 27701:2019 certification.

Intellicheck CEO Bryan Lewis said the recertifications underscore the company's dedication to the most rigorous standards for securing both customers' and company data. "This achievement is one more validation of the strength of our commitment to our clients, partners, and stakeholders. Intellicheck remains a world-class company at the forefront in providing market leading on-demand digital and physical validation solutions that accelerate customer onboarding and enhance trust with a secure, frictionless experience while assuring the utmost standards in data security and privacy."

ISO/IEC 27001:2013 is an information security management system standard published in October 2013 by the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC). Achieving ISO/IEC 27001:2013 recertification validates the strength and effectiveness of Intellicheck's information security management system (ISMS\InfoSec) and Privacy Information Management System (PIMS) and signifies the company's commitment to securing both company and customer data.

ISO/IEC 27701:2019 is a privacy extension to the ISO/IEC 27001:2013 Information security standard that is published by the International Organization for Standardization (ISO), the world's largest developer of voluntary international standards, and the International Electrotechnical Commission (IEC). The recertification is based on the meticulous review that found Intellicheck has implemented several security measures and countermeasures that protect it from unauthorized access or compromise PII and IT personnel were found to be conscientious and knowledgeable in best practices.

Intellicheck provides both digital and physical identity verification solutions to industries where speed and certainty is crucial. These include financial services, social media, automotive, insurance, law

enforcement and identity access management. Intellicheck's services are used by many of the top 12 banks and credit card issuers, at more than 30,000 retail locations, two of the major social media companies, and more than half of the state-level law enforcement agencies in the U.S.
